

Hiring 20 new Employees

Number of senior Engineers already at company:

41

Number of mid Engineers already at company:

12

Number of junior Engineers already at company:

33

Number of senior Product Manager already at company:

10

Number of mid Product Manager already at company:

42

Number of junior Product Manager already at company:

30

Explanation:

The results show that there are 0 seniors in both Engineering and Product Management departments. Additionally, there is already a high number of Juniors in each. As for mid employees, Product Management has a much higher number, but both have enough. Therefore, priority should be given to hiring senior employees. We can hence hire 10 seniors for each department, since we are only basing our decision on gaps identified in current skill sets and talent acquisition (If we were taking salaries/cost into consideration, we would have hired a bit less seniors since they cost more). Finally, we want to choose the seniors with highest experience, therefore the ones that have the most years at company.

List of the 20 new employees:

Employee_ID	Name	Department	Exerience Level	Years at Company
51157	Austin Dickerson	Engineering	Senior	14.0
98064	Leah Mckinney	Engineering	Senior	13.0
